

DENTAL FLOW
Learn & grow

Master Class 2

PROGRAM

Mastering the **anterior** region
26, 27 & 28th September 2024

IMMEDIATE ESTHETICS & LOADING STRATEGY

WWW.DENTALFLOW.ORG

9:00- 10:00 Biological principles

- Program presentation
- Anatomical consideration in the esthetic area
- Biological Principles of socket healing in the esthetic zone (30')
- Decision making and risk assessment for immediate placement & Immediate loading

10:00 -10:30 Surgical Aspect PART 1

- Immediate Implant Procedure
- Implant timing (Immediate Implant vs early)
- Implant Digital Planning for immediate (Basic esthetic consideration)
- Comprehensive esthetic planning (Smile cloud)

Break

11:00 - 12:30 Surgical Aspect PART 2

- Immediate Implant Procedure
- Implant Selection
- Extraction Techniques
- Implant Placement strategy (free Hand vs Guided Surgery)
- Primary Stability rationals
- Soft tissue management

Lunch

13:30-15:00 Prosthetic Aspect

- Immediate Loading procedure
- Pre-requisite for immediate loading
- Emergence profile & Prosthetic Design
- Digital strategies (Intra-oral impression - Printing Vs milling)
- Tibase selection
- Alternatives for provisionalisation
- Final rehabilitation
- Technological advancements for immediate loading: (1One – IOS –3D printing)

Break

15:30-17:30 Workshop 1: Digital Workshop

- 3D Printing Technology
- Smile Design with Smilecloud
- Implant Planning (Codiagnostix)
- 3D Printing Technology
- Esthetic planning workflow and virtual mock up order (smilecloud)

26/09

9:00- 10:30 Single Unit Workflow

- Digital Workflows adapted to your practice and environment
- Guided surgery and prefabricated restoration Workflow
- Shell technique workflow
- Same day digital prosthetic workflow (Lab externalization)
- Digital Chairside printing Workflow

Break

11:00 - 12:30 Partially edentulous Workflow

- Treatment planning and sequencing
- Guided surgery workflows
- Managing immediate pontic sites
- Managing Temporisation
- Implant site position strategy
- Clinical case discussion

Lunch

13:30-15:00 Workshop 2:

- Immediate Implant & digital prosthetics
- Freehand Immediate Implant placement loading chairside production
- Immediate Restoration workflow through guided surgery (Digital impression & chairside printing)
- Immediate implant assisted with pilot drill guided surgery workflow
- Immediate restoration with temp shell technique

Break

15:30-17:00 Immediate Within Global Esthetic Rehabilitation

- Esthetic Rehabilitation
- Comprehensive esthetic cases - Smilecloud
- Organizing Logistics and workflows
- Global implant and teeth rehabilitation : step by step through digital workflows
- Insight into full arch immediate rehabilitation

After Course : OFFICIAL DINNER

27/09

9:00- 10:30 Workshop 3:

- Immediate Implant guided surgery
- Soft tissue Management
- Immediate placement and loading assisted with full Guided surgery workflow
- Prefabricated Immediate restoration
- Connective tissue grafting techniques

Break

11:00 - 12:30 Advanced Technique for Immediacy

- Socket Shield Technique
- IDR Technique
- Alternative for Immediacy (Cantilever, Early approach...)
- Risks and complications

28/09
